GROUP 3600

IN THE CLAIMS

Please amend the claims as follows [A marked up copy of the claim is provided in
Appendix A]:

1. (Amended) A method of fastening a building board to a framework of a
building, which is characterized in that a building board having a flat configuration and
provided on the rear surface thereof with engaging protrusions, and an elongated fixture
which is adapted to be detachably engaged with the building board are employed, and
that the building board is assembled in advance together with the elongated fixture
through an engagement between the engaging protrusions and the elongated fixture, and
then the elongated fixture is fixed to the framework of a building, thereby fastening the
building board to the framework of a building.

12. (Amended) A method of fastening a building board to a framework of a
